Emmanuel Tekle

Platform / DevOps engineer (student, HBO Cybersecurity & Cloud Engineering) · Azure AZ-104 + AZ-305 · AI platform live in production

Enschede, NL · emmanueltekle@gmail.com · emmanueltekle.nl
linkedin.com/in/emmanuel-tekle-3485b334a · github.com/E-mma9 · Dutch nationality · Available Feb – Jul 2027, full-time

PROFILE

Azure-certified (AZ-104, AZ-305) engineer who ships production systems while still studying. Designed and built, solo, an AI support agent that is live for ~200 client organisations of a managed service provider. It is hosted on Azure and stops at a diagnosis note for an engineer. 2 years of hands-on production experience across cloud, identity and containers. Preparing for the CKA.

EXPERIENCE

Automation & Infrastructure Engineer Sep 2026 – Jan 2027
JUICT B.V. (internship, managed service provider, ~200 client organisations) · Haaksbergen, NL

- Automated standard IT changes end-to-end in production: self-service portal → RPA workflow → PSA API, for ~200 client organisations.
- Azure platform for an internal CRM: hosting, PostgreSQL and the release pipeline.
- Daily Azure DevOps: branching, pull requests, code review, CI/CD.

Systems Administrator Apr 2025 – Aug 2026
Livio (healthcare organisation) · Enschede, NL

- Co-designed and ran the production Entra ID / hybrid identity platform of a healthcare organisation: Conditional Access, RBAC, group design, Entra Connect sync and Group Policy.
- Operated within ISO 27001 / NEN 7510 for patient-related data: least privilege, access control, logging and audit.

PROJECTS

AI support agent in production (built solo) Live since 16 Oct 2026
Azure-hosted · ~200 client organisations

- Reads a new ticket from the PSA, a documentation platform and RMM, then writes a diagnosis note for an engineer to review.

Mini Payments API – containerised, local Kubernetes manifests Oct 2026 – present
github.com/E-mma9

- Spring Boot + PostgreSQL/Flyway service with tests, a Docker multi-stage image, docker-compose and local Kubernetes manifests. Not deployed to a cluster.

Homelab – 3-node Proxmox VE cluster In progress

- Proxmox VE cluster in progress. kubeadm for CKA practice is in progress. Terraform, Ansible and Wazuh are learning, not a finished platform.

Monitoring Homelab – production-style observability Ongoing
github.com/E-mma9/Monitoring-Homelab

- Prometheus, Grafana and Alertmanager with custom alert rules, blackbox checks and PagerDuty paging, tested end-to-end.

CERTIFICATIONS & EDUCATION

Microsoft Certified: Azure Administrator Associate (AZ-104) Oct 2026
Credential ID 4C620F71E4B4DAAC · verify on Microsoft Learn

Microsoft Certified: Azure Solutions Architect Expert (AZ-305) Nov 2026
Credential ID 84E42349E29D8743 · verify on Microsoft Learn

Certified Kubernetes Administrator (CKA) Exam planned spring 2027

Bachelor Cybersecurity & Cloud Engineering (HBO), Saxion Sep 2024 – Jul 2028 (expected)
Year 3 · Average 7.1 · Virtualisation (10), Public & Hybrid Cloud (9), Automated Infrastructures (9)

SKILLS

Cloud & IaC	Hands-on: Azure (AZ-104, AZ-305), Bicep, Linux, PostgreSQL. Learning: Terraform, Ansible.
Containers & orchestration	Hands-on: Docker, docker-compose. Learning: Kubernetes (local manifests, CKA prep).
CI/CD	Hands-on: Git, Azure DevOps. Learning: GitHub Actions.
Observability	Hands-on: Prometheus, Grafana, Alertmanager. Learning: Wazuh.
Identity & security	Hands-on: Entra ID, Conditional Access. Learning: Trivy.
Scripting	Hands-on: Bash, PowerShell, Python (basic), Java/Spring Boot (basic).
