PROFILE

Azure-certified (AZ-104) engineer who ships production systems while still studying. Designed and built, solo, an AI support agent that now handles every new ticket for ~50 client organisations of a managed service provider, on a private, identity-first Azure platform with a fully automated, security-scanned delivery pipeline. 2 years of hands-on production experience across cloud, identity, CI/CD, infrastructure as code and containers. Preparing for the CKA; heading for platform engineering and DevSecOps.

EXPERIENCE

Automation & Infrastructure Intern — Sep 2026 – Jan 2027

JUICT B.V. (managed service provider, ~200 client organisations) · Haaksbergen, NL

- Eliminated manual engineer work for standard IT changes by automating them end-to-end in production: self-service portal → Rewst RPA workflow → Autotask REST API, for ~200 client organisations.
- Sole owner of the Azure platform behind the company CRM: hosting, PostgreSQL, secrets management and the release pipeline.
- Daily Azure DevOps: branching, pull requests, code review, CI/CD.

Systems Administrator — Apr 2025 – Aug 2026

Livio (healthcare organisation) · Enschede, NL

- Co-designed and ran the production Entra ID / hybrid identity platform of a healthcare organisation: Conditional Access, RBAC, group design, Entra Connect sync and Group Policy.
- Operated within ISO 27001 / NEN 7510 for patient-related data: least privilege, access control, logging and audit.

PROJECTS

AI support agent in production – JUICT (built end-to-end, solo) — Live since Oct 2026

Hermes agent + Claude · Azure Container Apps · Azure DevOps

- From idea to production in seven weeks: the agent researches every new support ticket for ~50 client organisations and delivers a diagnosis note in 1–2 minutes, ~45 runs per workday, 200+ runs and zero data incidents in the first week; 17 read-only tools over Autotask, IT Glue and Datto RMM.
- Platform as code: Azure Container Apps, Service Bus queue + job, PostgreSQL, Key Vault via managed identities, ACR, Bicep, scale-to-zero. CI/CD with unit tests, pip-audit, gitleaks, health-checked rollouts and PR build validation; nothing reaches production untested or unscanned.
- Security by design, enforced in code rather than prompts: one ticket per run, zero credentials inside the agent, secret fields filtered, prompt-injection attempts detected and refused. Now designing a second agent for sales: MCP server as the only write path, human approval before any send.

Mini Payments API – Spring Boot on Kubernetes — Oct 2026 – present

github.com/E-mma9

- Spring Boot + PostgreSQL/Flyway service with tests and a Docker multi-stage build; next: Kubernetes, GitHub Actions with Trivy, AKS via Terraform.

Homelab – 3-node Proxmox VE cluster — Ongoing

- Self-built platform as code: Terraform + Ansible provisioning, CI in GitHub Actions/GitLab CI, Wazuh SIEM; kubeadm cluster in progress for CKA.

Monitoring Homelab – production-style observability — Ongoing

github.com/E-mma9/Monitoring-Homelab

- Prometheus, Grafana and Alertmanager with custom alert rules, blackbox checks and PagerDuty paging, tested end-to-end.

CERTIFICATIONS & EDUCATION

Microsoft Certified: Azure Administrator Associate (AZ-104) — Oct 2026

Credential ID 4C620F71E4B4DAAC · verify on Microsoft Learn

Microsoft Certified: Azure Solutions Architect Expert (AZ-305) — Nov 2026

Credential ID 84E42349E29D8743 · verify on Microsoft Learn

Certified Kubernetes Administrator (CKA) — Exam planned Jan 2027

HashiCorp Terraform Associate – exam planned Nov 2026

Bachelor Cybersecurity & Cloud Engineering (HBO), Saxion — Sep 2024 – Jul 2028 (expected)

Year 3 · Average 7.1 · Virtualisation (10), Public & Hybrid Cloud (9), Automated Infrastructures (9)

SKILLS

Platform	Azure (AZ-104), Azure Container Apps, Docker, Kubernetes (CKA prep), Linux, PostgreSQL
Automation	Azure DevOps Pipelines, GitHub Actions, Terraform, Ansible, Bicep, Git
Security & observability	Entra ID, Key Vault, managed identities, Prometheus, Grafana, Wazuh, Trivy, gitleaks
Scripting	Bash, PowerShell, Python (basic), Java/Spring Boot (basic)

LANGUAGES & INTERESTS

Dutch (native), English (professional), German (elementary) · Competitive kickboxing (B-class, 9–1) · Speedcubing (Dutch top 20, 2019)
